Thanks for joining the NoCry pack and choosing us. You're the reason we can make high-quality everyday-use products that are as hard-working (and hard-wearing) as you.

We'd like to help you make the most of your brand new Vented Safety Goggles. That's why we put together these instructions. Read on to discover how to use and look after your goggles so they last.

READY TO PUT YOUR NEW SAFETY GOGGLES ON FOR THE FIRST TIME?

Get your safety goggles set up by following these two simple steps.

1

Take the safety goggles out of the plastic wrapping

2

Slip the goggles over your head and adjust the headband until they feel snug and comfortable against your skin.

If you're wearing prescription glasses when you put your goggles on, make sure there's enough space between the lenses so they don't rub. Otherwise, you may accidentally damage both pairs.

LOOKING AFTER YOUR GOGGLES IS QUICK AND EASY - ALL YOU NEED IS A MICROFIBER CLOTH AND A SOFT STORAGE POUCH

Ready to clean your goggles? Grab a clean, soft microfiber cloth and gently wipe down the lenses. When you're done, store your goggles in a soft microfiber pouch. (Or just wrap them up in a microfiber cloth.)

Store them with the same care and attention you'd use for any other pair of glasses or goggles - away from anything sharp or scratchy that could damage the lens coating. Because if your lense get scratched, it'll get hard to see.

SAFETY GOGGLES ARE DESIGNED TO PROTECT YOUR EYES... BUT WHAT DO THEY PROTECT THEM FROM?

Don't let these goggles' lightweight, comfortable appearance fool you. Made with sturdy, scratch-resistant polycarbonate lense, these splash-proof goggles protect your eyes from hazards including:

- Wood chips while you're woodworking in the barn
- Chemical splashes while you're working in the lab or spraying the garden
- Grass, dirt, and debris from mowing the lawn
- Stray particles from sanding foam, worbla and other DIY and craft-friendly materials
- And more

WHAT SHOULDN'T I USE THESE GOGGLES FOR?

Your new goggles protect you from light, low-impact debris like wood chips, sparks, dust, and liquid splashes. They are **not** designed for heavy-duty industrial use and **don't** give you sufficient protection against heavy debris or corrosive chemicals. **Don't** use them for any work that exposes you to heat - like welding.

HOW DO YOU LIKE YOUR NEW NOCRY VENTED SAFETY GOGGLES?

Help customers just like you make better choices by sharing an honest review of your experience on amazon or ★ Trustpilot

Your feedback helps us serve you better and it helps others choose the best products.
