

For your safety and to get the best out of your new glasses, please take a moment to read through these care and use instructions

1 The NoCry Glasses

The lenses are equipped with UV400 protection, and an anti-scratch and anti-fogging coating.

2 Cleaning Your Glasses

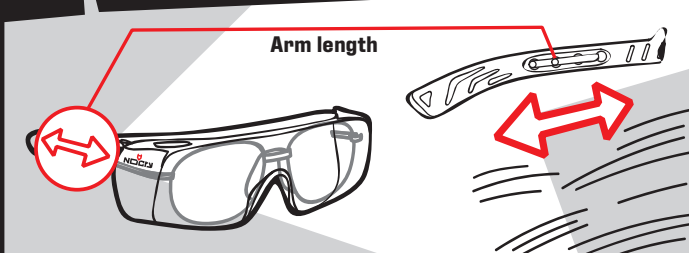

Clean the glasses only using a dry or water-moistened soft micro-fiber cloth. Do not use chemicals.

3 Storing Your Glasses

When not in use, store the glasses in a protective case.

4 The Glasses are Highly Adjustable

Before using the glasses, ensure that you adjust them to fit your face comfortably and securely. To adjust your glasses, make sure **to only pull and push, avoid rotating and rolling**. In case one of the buttons comes out of their socket, simply rotate it back into place.

5 Attention!

Ensure that your glasses fit correctly inside the goggles, so they won't touch and rub against one another. Although goggles have an anti-fog coating, prescription glasses underneath can still fog up. Consider using an anti-fog spray if this issue arises.

6 Carefully Assess Your Working Environment

Make sure that the glasses are the most suitable means of protection from potential threats you are likely to be exposed to in your working environment.
