

For your safety and to get the best out of your new HiVis vest, please take a moment to read through these care and use instructions

1 Meet the HiVis Vest

ANSI/ISEA
107-2020
Type R
Class 2

Your HiVis vest is made of moisture-wicking, wrinkle-resistant polyester tricot and is equipped with a nylon hook and loop closure.

2 Cleaning Your Vest

Max: 25x washing cycles

Machine wash it with a mild detergent, and allow it to air dry. Avoid bleach or harsh chemicals. To comply with the Visibility Standard, the vest should be washed a maximum of 25 times.

3 Storing Your Vest

Store your HiVis vest in a clean and dry place when not in use. Avoid exposing it to direct sunlight for extended periods to protect the reflective material.

4 How to Wear Your Vest

The vest should cover your upper body and torso. Fasten it securely using the front hook and loop, ensuring it's neither too loose nor too tight.

5 Inspect Your Vest Before Each Use

Ensure the reflective strips are clean and unfaded. If the vest is damaged or the reflective material is no longer effective, replace it immediately.

6 Be Aware of Adverse Weather Conditions

The HiVis vest enhances visibility, but in adverse weather conditions, such as heavy rain or fog, its effectiveness may decrease. Be extra careful and consider additional safety measures.

7 Wearing the HiVis Vest Does Not Guarantee Your Safety

Always be aware of your surroundings and exercise caution. Depending on your location and occupation, specific regulations regarding the use of HiVis vests may apply. Ensure you comply with all relevant laws and regulations.
