

For your safety and to get the best out of your new gloves, please take a moment to read through these care and use instructions

1 Meet the ToughFit Gloves

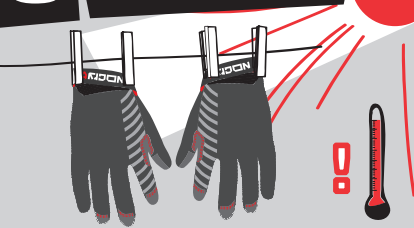

Made from a moisture-wicking and breathable mix of spandex and polyester, your gloves feature a pre-curved design for a perfect fit and a reflective pattern to ensure high visibility.

2 Washing Your Gloves

Machine wash at 30°C/86°F with a mild detergent. Avoid hot water to prevent shrinking and do not use bleach or fabric softeners, as they can break down the fabric.

3 Storing and Drying Your Gloves

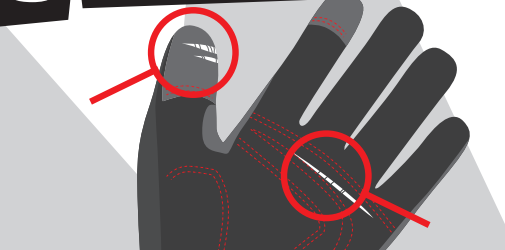

Your gloves are suitable to be worn in sunlight. However, when not in use, store them in a cool, dry place. Dry them away from direct sunlight to prevent fabric damage and shrinking.

4 Fitting Your Gloves

1. Open the hook and loop strap at the cuff. 2. Slide your hand into the glove. 3. Close the strap and adjust it for a comfortable, secure fit. Ensure that the gloves have a snug fit with no excess fabric. The hook and loop also doubles as a pull tag, making it easier to put your gloves on.

5 Ensure Proper Protection

Before using the gloves, inspect them for any signs of damage, cuts, or tears. Damaged gloves should be replaced immediately to ensure proper protection.

6 Carefully Assess Your Working Environment

For your safety, always follow proper procedures and use additional protective equipment as needed. **Do NOT** use these gloves when handling machinery or power tools; they can get entangled in the equipment, increasing the risk of injury.
