

**Because keeping you safe is our top priority...
You must read through the following care and use
instructions before using your new wrist guards.**

1 The NoCry wrist guards

Made of foam cotton, PU leather and Oxford fabric with durable ABS splints.

2 Cleaning your wrist guards

Clean only by using a brush or a washcloth with neutral detergent. Never machine wash.

3 Storing your wrist guards

Avoid storing in direct sunlight or at high temperatures.

4 Putting on and securing the wrist guards

Do not overtighten or wear too loose. Adjust the straps to ensure a comfortable fit.

Open the hook'n'loop straps to unfold the guard and then guide your thumb through the thumb hole. Fold the guard over your hand and adjust the three straps to secure it.

5 Wearing the wrist guards

Make sure that the splint is positioned on your palm and properly secured. Also ensure that the wrist guards are not too small or big for your hands.

6 Removing the ABS splints

Release the plastic splint by pushing it down as shown above and then remove it from its pocket.

7 Attention!

The wrist guards are designed to provide protection against possible impacts. They are not built to guard against various injuries that can result from sports or other accidents. The wrist guards should be properly sized and fitted to provide maximum protection.

Parents & Guardians : always supervise children / minors who are using the wrist guards!
